

ZEN Accelerator package for Digital Learning

Boost workforce productivity!

What is it?

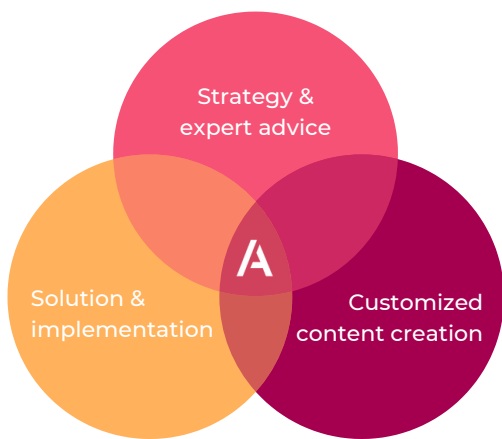

An all-in-one solution that standardizes the implementation of SAP Litmos or SAP Enable Now in your organization, enabling you to meet your digital learning goals and go live on time on budget!

Qualified by SAP, the ZEN Accelerator combines a strategic methodology based on learning best practices with preconfigured templates and content.

For who?

This package suits small, medium and large enterprises looking for solutions to create and distribute corporate training and content with their entire ecosystem.

Your employees, vendors and partners will develop new skills and will be more engaged, satisfied and equipped to deliver the best customer experience possible.

ZEN Best Practice Methodology

To help you with the most effective implementation of your training needs, we created a best practice methodology. This methodology is based on real-life self-assessments to maintain quality throughout the project and to make sure you can remain 'ZEN'.

We enable and implement your training platform or e-learning tool from setup to support. By combining pre-configured structures and specific content, we are able to deliver superior learning solutions faster without compromising quality. In general, we created a standard 'menu' to reduce development costs and time.

Key benefits of this package

1. Accelerate time to rollout and reduce effort

Our Zen Best Practice reduces the development time. That makes it both cost-effective and time-efficient.

2. Provide consistent content and increase flexibility

Your authors don't need to waste their time on design. They know where to place content and visuals every time.

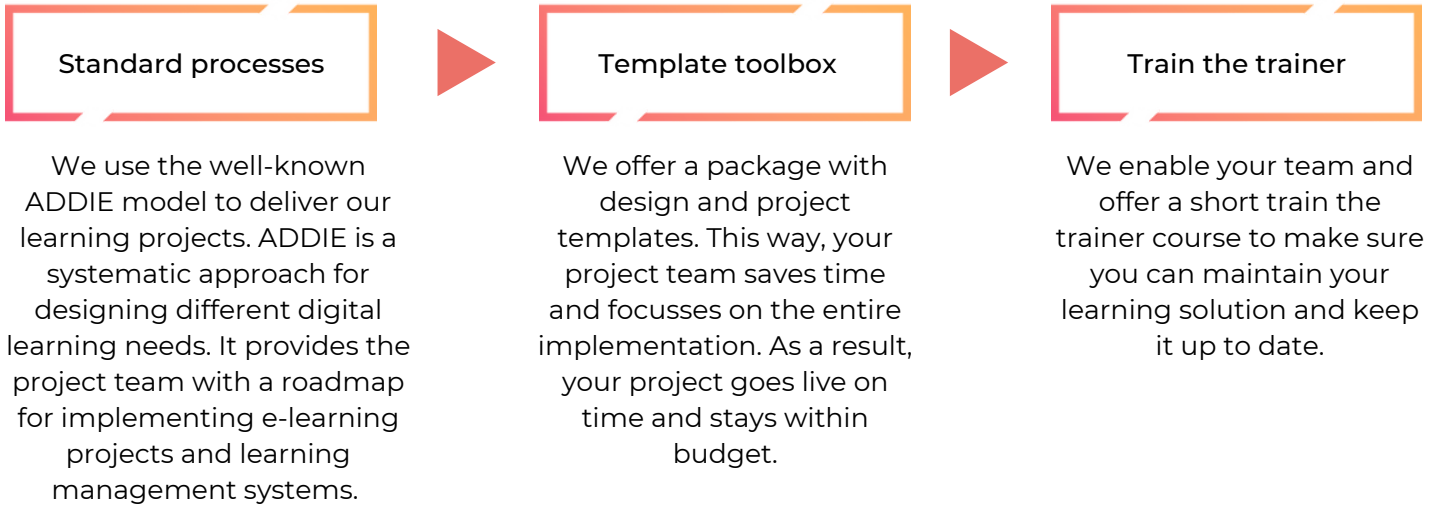

3. Address common challenges and reduce risks

Many businesses face the same learning challenges. Our accelerator package provides a clear solution that is tested, approved and ready to go!

How Amista's ZEN Accelerator Package helps you

1 Learning strategy

We share our knowledge and expertise on blended learning strategies and change management. We deliver expert advice to help you with more advanced topics or complex projects.

2 Learning solutions

We enable and implement your training platform or e-learning tool from setup to support. This includes installing the components, basic content structuring and setting up a customized design and templates.

SAP Litmos

Corporate learning tool to manage all training materials. It is a next-generation Learning Experience Platform (LXP) to train your internal teams, external partners, customers... and distribute content.

- ✓ Fast user-onboarding
- ✓ Robust analytics and reporting
- ✓ Simple integration and quick deployment
- ✓ Universal accessibility
- ✓ Easy course creation as compliancy training, soft skills...
- ✓ Off-the-shelf content

SAP Enable Now

Corporate learning tool to create digital content for both IT and non-IT related training. It is also an E-learning solution that offers in application help for SAP solutions (S/4HANA, Ariba, SuccessFactors, ...).

- ✓ Different outputs from 1 recording
- ✓ Template-based content creation
- ✓ Multi-modality for content re-use
- ✓ Intelligent user assistance
- ✓ Ideal for software or IT-related training

3 Learning content

We create rapid e-learning and simulations both for IT and non-IT related topics. We enrich and customize the learning experience with avatars, quizzes, audio and video aligned with your corporate branding. The content created in SAP Enable Now can be perfectly integrated in SAP Litmos. Our team is very experienced in creating interactive and challenging e-learning paths.

“Every euro invested in online training, results in 25 euros in productivity.”

loyalty & engagement

Why Amista

Agile

We go for short iterative implementation cycles focusing on the features that provide the most business value. This allows for a higher return on investment.

Professional

We don't just implement solutions and leave. We want to make sure the end-user is enabled and confident with the new system.

Reliable

We commit to solutions that we think are feasible and go the extra mile to make sure we can deliver.

Experienced

Our team is a highly qualified group that efficiently presents projects and secures agreements: our say/do ratio is 1. Feel free to talk to our clients.
